

Through the years, we have built many 16' Northwind canoes in cedar canvas. For paddlers looking for a narrow beam, fast tripping canoe, this model is the obvious choice.

The Northwind can carry a good load and can be paddled either solo or tandem. We are now making this model in cedar strip epoxy to fill many requests. The Northwind's long narrow shape makes it ideal for the cedar strip epoxy method of building. Its' classic profile is in keeping with traditional designs.

16' Northwind

- Length : 15' 11 1/8"
- Beam : 31 3/4"
- Bow Height : 22"
- Depth : 13"
- Rocker : 3"
