

15' Original Peterborough Rowing Skiff

Length : 15' 1"

Beam : 40"

Bow Height : 21" (with keel)

Depth : 14 1/2"

This venerable craft was made for many years by the Peterborough Canoe Company and was used by cottagers, recreational rowers and fishermen.

Lines for this model were taken by Joe Ziemba from an original still in his possession. Its four seats and two position oarlocks allow for easy trim with varying loads. Straight tracking, easy rowing. It is still the finest rowing skiff for recreational rowing and fishing.
